Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 5 rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent document (4-347192).

Japanese patent document (4-347192) teaches the needle bar drive apparatus as claimed including a dedicated drive source for driving a needle bar of the sewing machine to move up and down; and control means for, when a sewing operation is to be performed, controlling said drive source to cause the needle bar to move up and down within a predetermined stroke range, but, when no sewing operation is to be performed, controlling said drive source to cause the needle bar to retreat to a predetermined evacuation position set above a top dead center within the predetermined stroke range.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent document (4-347192) in view of Marcandalli (4616585).

Japanese patent document (4-347192) teaches the invention as claimed as set forth above in the rejection to claim 1. Japanese patent document (4-347192) does not set forth a variable stroke range. Marcandalli teaches a variable stroke range for a sewing machine. It would have been obvious at the time the invention was made to provide the sewing machine of Japanese patent document (4-347192) with a variable stroke range in order to allow sewing of different sized fabrics as suggested by Macandalli.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
